ADI designs and manufactures a system, called the web/i, that provides web-based monitoring and control of energy management systems. The web/i consists of an embedded Linux web server as the hardware platform, with native drivers that communicate with the proprietary protocol of the energy management system. The driver writes the point values to an SQL database that resides on the Linux web server. The application software used to interact with the control system also resides on the Linux web server. The web/i can be installed in less than an hour at most facilities. All system configuration, graphics building and access is through a standard web browser and does not require proprietary software, or seat licenses, to use the system.

The web/i has also been deployed at facility meters to provide real-time access to meter data. The data is pushed up to a central server which populates a database and provides users access to the information in real-time through a standard web browser and whatever enterprise software package that is being utilized by the provider. More information is available at www.adi-it.com.

ADM Associates, Inc. is a professional service corporation providing research and consulting services in applied engineering and economics to clients in business, industry and government. ADM has both analytical and practical capabilities for analysis of energy use by households and by commercial and industrial firms. We have strong capabilities in analyzing commercial and residential end-use loads, in assessing commercial and residential appliance technologies, in developing and evaluating energy-efficiency programs, and in developing forecasts of energy use by end-use. Moreover, our analytical capabilities are complemented by our strong, hands-on capability in conducting large-scale projects to collect energy-related data on households and on commercial and industrial firms.

Baker & OBrien is a professional consulting firm serving clients involved in the processing, distribution, and utilization of hydrocarbon fuels and chemicals. Our consulting staff consists of seasoned chemical engineers that have experience in dealing with both technical and commercial matters. Although many of our clients are operating companies, we frequently are also engaged by the banking, legal, and insurance professions who service similar clients. Our assignments typically call for fundamental technical knowledge and commercial experience to find solutions to complex technical, operational, or business issues. We maintain offices in Dallas, Houston, and Long Beach. You may visit us at our website at www.bakerobrien.com.

BPS supplies the Turbogogen (TM) power generating system combines proven technologies with flexible controls to provide cogeneration solutions that efficiently and cost effectively produce combined heat and power (CHP) at the point of energy consumption. BPS delivers CHP solutions with efficiencies greater than 80% along with improved power quality, increased power availability and reduced emissions.

Our proprietary core technologies include:

- high speed electrical generators
- power conditioning electronics
- control and applications software
- sub-system components including gas-boost compressors

We couple these unique enabling technologies with microturbine engines from the industrys leading supplies to create TURBOGEN (TM). BPS offers a unique range application that can operate in grid-connect island operation and in-parallel (load share) modes while providing clean superior quality.

Catalytica Energy Systems is responding to a growing demand in the energy industry for cost-effective solutions for cleaner power through our commitment to the discovery, development, and manufacture of innovative technologies focused on easing the environmental impact of power production. Our first product, Xonon Cool Combustion, is a breakthrough pollution prevention system that enables gas-fired turbines used in electric power generation to achieve a significant reduction in air pollutants to ultra-low levels. We are also actively engaged in a number of research and development initiatives that include work on fuel processing systems for fuel cells used in automotive applications, as well as application of our proprietary Xonon technology to microturbines, hybrid gas turbine / fuel cell farms, and diesel engines.

Energy Saving Systems is the Western Distributor and a Dealer for PROATEQ, a Polarized Refrigeration Oil Additive. A 20% electric power savings can be expected when PROATEQ is added to commercial, industrial, or institutional refrigeration systems, air conditioning, or heat pump applications. These savings are validated by many documented case studies which include FEMP (Federal Energy Management Program) and the Oak Ridge National Testing Laboratories. Investment payback is within one year of installation.

PROATEQ is safe and is compatible with all refrigerants and compressor oils.

Engine, Fuel and Emissions Engineering, Inc. (EF&EE) is an engineering and consulting firm specializing in the measurement and control of air pollutant emissions from motor vehicles and other mobile sources, as well as conventional and alternative fuels and air quality issues worldwide. In a series of projects for the World Bank, EF&EE staff have literally "written the book" on strategies for controlling motor vehicle emissions in developing countries, and have helped to apply these strategies in cities from Bangkok to Buenos Aires. In the U.S., EF&EE and its professional staff have played important roles in the phaseout of leaded gasoline, development and reevaluation of present diesel emission control strategies, and development of technologies and emission regulations for natural gas vehicles.

Hi-Z develops, manufactures, and sells commercial thermoelectric generating modules for converting heat into electricity. Currently, Hi-Zs modules are being used to generate electricity in a varied array of applications all over the world. The potential market for these modules is well over \$1 billion. Hi-Z modules are used for waste heat recovery from vehicles and furnaces. In addition, Hi-Z is developing thermoelectric generators for remote power applications that use oil, gas or nuclear isotopes as the heat sources. These applications run the gamut of power for cellular telephones, pellet stoves, heaters and portable appliances to powering transmitters in Micro Air Vehicles and Space Probes.

Our Company was started to provide innovations in energy solutions. First developed in the early 90s, the A/C Aider Supercooler (retro-fit) a patented process to lower electrical energy, used by central air conditioning was introduced into the local market. Results for electrical energy savings was an amazing 50%. In 2001, we have created the Envirogen 2kw package, electrical generation system. Powered by a single solar panel, the product creates 2,000 watts of continuous power on a 24/7 basis. Designed and engineered for no pollution or high temperatures this self contained unit produces 122,640 kwhs over 7 years, with minimal maintenance. We believe our Envirogen will offer energy solutions both for the environment and our future electrical demands.

The firms principals are Charles and Peter Kuhn. They are certified energy auditors and professional mechanical engineers registered in California. Charles Kuhn has an M.S. in Industrial Engineering and Operations Research, UC Berkeley. Peter Kuhn has an M.S. in Mechanical Engineering, UC Berkeley.

Since 1980 Kuhn & Kuhn has participated in energy related projects at hundreds of public and private sector facilities. Project reviews are a specialty for Kuhn & Kuhn. The company provides independent reviews of conservation, cogeneration, and alternative energy technology projects at all stages of project development. Energy conservation projects include evaluation of lighting retrofits, heat recovery, motor controls, energy management systems, and chiller plant retrofits. In some cases Kuhn & Kuhn has identified measures costing less than \$30,000 which save over \$300,000 annually. Cogeneration projects in which Kuhn & Kuhn has participated include natural gas engines and combined cycle systems for diverse facilities. The companys involvement ranges from initial feasibility studies through design specifications to post-construction performance reviews. Renewable resource projects include a waste recycling plant with organic digesters, a 50 MW biomass facility, and solar heating systems. The primary goal of Kuhn & Kuhn is to dramatically reduce client energy costs while improving facility performance. The companys small size is an advantage in reaching that goal. It ensures active involvement of the principals while reducing overhead and turnaround time. When more personnel are required, the company relies on a broad array of specialists.

Solatube International Inc. is the innovator of the tubular skylight, a revolutionary daylighting product for residential and commercial applications. A patented reflective system located inside a rooftop dome collects and redirects light down a highly reflective tube to a diffuser at ceiling. Solatubes Brighten Up Series includes 10- and 14-inch units, which are ideal for residential and smaller commercial spaces. The SolaMaster Series, featuring the flagship 21-inch unit was designed with large spaces in mind and offers a unique daylighting option for commercial buildings and larger areas of the home. Another Solatube energy-efficient product is Solar Star, a solar-powered attic fan.

Since its inception in 1981, SPEC Services has maintained its original focus, System Planning, Engineering, and Coordinating (SPEC). SPEC Services offers full service engineering and design services with registered professional engineers in each discipline. These discipline include chemical, environmental, mechanical, electrical, structural/civil, and fire protection engineering. Additional technical staff includes designers, drafters, right-of-way personnel, surveyors, and project support.

SPEC Services core client base includes a number of energy-related industries, including Power Generation and cogeneration, Oil and Gas Production, Electrical Power Distribution, Pipelining, Refining and Marketing, Telecommunications, Industrial Manufacturing, Food and Beverage, and Municipal Waste Water Plants.

Our primary focus is to provide the services that the client needs and wants.

Our successful growth is due largely to the value we provide by interacting with clients on projects in which our diagnostic expertise is combined with excellence in execution. The majority of our projects are from repeat clients and referrals, testimony to SPEC's availability to perform within budget and schedule in addition to meeting or exceeding expectations.

Sun Frost primarily manufactures energy efficient refrigerators. An energy efficient Sun Frost refrigerator makes powering a home with photovoltaics or other low output energy sources both feasible and affordable. These units are available in AC power for cutting utility bills of DC power for alternative energy uses. The super efficient solar powered vaccine storage refrigerators are WHO approved and used in over 50 developing countries.

In addition, Sun Frost is currently developing energy efficient DC air conditioners for cooling sleeping area both in solar powered homes and long haul trucks.

Tetra Tech EM Inc. (Tetra Tech) is a large publicly owned business that provides specialized environmental and energy management services to government and commercial clients. A wide range of technical capabilities is available at 37 offices in the US and in strategic locations around the world.

Tetra Tech brings an integrated view of energy generation, transmission, and end-uses to energy management. We focus on integrating the environmental and economic aspects of energy management to apply environmentally sound, performance-based technology and management solutions to reducing energy and water usage at public and private sector facilities.

Tetra Tech has a range of contract venues available for both private and government clients. Services can be provided on a project basis or under master service agreements. Tetra Tech has approved California Multiple Award Schedules (CMAS) with the California Dept. of General Services to provide both environmental and energy management consulting services at state approved rates. The CMAS contract can be used by diverse government institutions such as State of California agencies, cities, counties, other local government bodies, and public education entities. Tetra Tech also has a venue for federal energy management and environmental contracts under two U.S. General Services Administration (GSA) Schedules.

U.S. Battery makes a complete line of premium golf car, sweeper/scrubber, marine, and special application deep-cycle batteries. All of our deep-cycle batteries are built using a proprietary Antinium (TM) grid alloy, which allows our batteries to out perform comparable brands. Not only do our batteries run longer, they gas less, which means your service time and maintenance costs are reduced. U.S. Batterys exclusive features provide you with the most technologically advanced deep-cycle battery available.

Western Pacific Signal is presently the largest supplier of energy-saving LED traffic signal lamps to Caltrans, and the majority of all City and County agencies within California. WPS is the exclusive distributor of Leotek Electronics Corp. USA, an EPA registered "Energy Star" power partner. WPS has an open \$12 Million purchase order with the State of California, which any public agency can order from. In addition to LED signal lamps, WPS provides modern traffic signal control assemblies and controller upgrades to public agencies. WPS provides Naztec brand Model 2070 controllers on a variety of signal upgrade and improvement projects geared to improve traffic flow on California highways.

ZFA Structural Engineers provides structural engineering services for power plant equipment and components. We are acting as "structural engineers of record" for parts of 11 major California power plant projects in the western United States. Our services include design or verification of reactions and anchorage, structures such as inlet supports, inlets, buildings and skids, and foundation design. ZFA also provides structural engineering services for schools, commercial buildings, hospitals, and wineries.
